A Note for Parents & Teachers

How to use this book

The method (what we learned from Kumon-style programs)

- **Tiny steps.** Each sheet is only slightly harder than the last, so a child almost always succeeds.
- **Repetition to mastery.** Five short sheets per skill build speed and accuracy before the next topic.
- **Self-learning.** Each unit starts with a one-page lesson with worked examples a child can read and copy.
- **Correct every mistake.** Check together with the answer key and let your child fix each wrong answer until the sheet is 100%.
- **Short and daily.** Ten to fifteen minutes every day beats one long session a week.

The weekly rhythm (about 12 weeks, 5 days a week)

- **Lesson day:** read the lesson together, study the examples, do “Try it yourself”.
- **Days 1–4:** daily practice sheets that climb in small steps. Write the time taken at the top.
- **Day 5:** review sheet with mixed questions and word problems.
- **Goal:** 90% or better in about 10 minutes. Below 80%? Repeat the sheet tomorrow (print a spare copy first).
- Take the Check-Up after Unit 5 and the Final Test at the end.

Tips that make it fun

- Stay close for the first few minutes, then let your child work alone.
- Praise effort and improvement, not just the score. Stop before frustration builds.
- Use real life: count stairs, tell time from the kitchen clock, pay with real coins.
- Colour in the tracker after each sheet – children love seeing progress.

About the levels: Kumon’s own pages do not match its levels to school grades, so this book follows the Common Core Grade 2 standards (listed per unit on the next page) and rises from **Starter** (Units 1–3) to **Building** (4–6), **Stretch** (7–9) and **Challenge** (10).

Unit 1 Lesson: Counting & Comparing to 100

Starter

My goal: I can count to 100, fill in missing numbers, and tell which number is bigger.

Learn

- Numbers go up by **1** each step: 23, 24, 25. Going backwards, they go down by 1.
- To compare, look at the **tens** first. 47 is bigger than 39 because 4 tens is more than 3 tens.
- If the tens match, compare the **ones**: 52 < 58.
- The symbol **<** or **>** opens its mouth toward the **bigger** number.

A hundred chart

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Examples

Example 1: Next number

What comes after 29?

29 + 1
= 30

Example 2: Compare

47 and 39
Tens: 4 > 3

47 > 39

Example 3: Missing

61, 62, __, 64

Count up by 1

= 63

Try it yourself! (answers are in the back)

1) | 5 | 6 | | 8 | 9 | | 11 | 12 |

2) 34 ◯ 29

3) 51 ◯ 58

4) 60 ◯ 60

5) 17 ◯ 71

Remember: Use the hundred chart to count: moving right adds 1, moving down adds 10.

Unit 2 Lesson: Adding Within 20

Starter

My goal: I can add two numbers that make up to 20.

Learn

- Addition means **putting groups together**. The answer is called the **sum**.
- **Count on:** start with the bigger number. 8 + 3 → say 8, then 9, 10, 11.
- **Make a ten:** 8 + 5 → 8 + 2 = 10, then 10 + 3 = 13.
- **Doubles:** 6 + 6 = 12. Learn these by heart!

Unit 3 Lesson: Subtracting Within 20

Starter

My goal: I can subtract numbers within 20.

Learn

- Subtraction means **taking away** or finding **how many more**. The answer is the **difference**.
- **Count back:** 9 – 3 → say 8, 7, 6.
- **Think addition:** 13 – 5 = ? What plus 5 makes 13? It is 8!
- **Go back to ten:** 14 – 6 → 14 – 4 = 10, then 10 – 2 = 8.
- A **fact family** uses the same 3 numbers: 5 + 8 = 13, 8 + 5 = 13, 13 – 5 = 8, 13 – 8 = 5.

12 – 5 = 7

Cross out 5. Count what is left.

Unit 4 Lesson: Two-Digit Add & Subtract

Building

My goal: I can add and subtract two-digit numbers when no regrouping is needed.

Learn

- Write the numbers so **ones line up under ones** and **tens under tens**.
- Always start with the **ones** column, then do the **tens** column.
- A two-digit number has tens and ones: 43 = 4 tens + 3 ones.
- Adding tens is like adding small numbers: 40 + 30 = 4 tens + 3 tens = 7 tens = 70.

43 = 4 tens + 3 ones

tens column | ones column

Examples

Example 1: Add

```
  32
+ 45
----
  77
```

Example 2: Subtract

```
  68
- 35
----
  33
```

Example 3: Tens only

50 + 30

5 tens + 3 tens

= 80

Try it yourself! (answers are in the back)

1) 24 + 15

Unit 5 Lesson: Regrouping: Carry & Borrow

Building

My goal: I can add and subtract when I need to carry or borrow a ten.

Learn

- **Carry:** if the ones add to 10 or more, make a ten and carry it to the tens column.
- **Borrow:** if the top ones are too small, take 1 ten from the tens and make it 10 ones.
- 1 ten = 10 ones. Nothing is lost; the ten just changes into ones.
- Always check the **ones column first** and ask: do I need to carry or borrow?

1 ten = 10 ones

Borrow a ten, get 10 ones!

Examples

Example 1: Carry

```
   1
  38
+ 27
----
  65
```

Example 2: Borrow

```
  52
– 27
----
  25
```

12 – 7 = 5, 4 – 2 = 2

Example 3: Why?

8 + 7 = 15 ones
15 ones = 1 ten + 5 ones
So write 5, carry 1

Try it yourself! (answers are in the back)

1) 47 + 36

2) 29 + 45

3) 63 – 28

4) 81 – 7

Remember: After you borrow, the tens digit is 1 smaller. Cross it out and write the new number!

Unit 7 Lesson: Skip Counting & Multiplying

Stretch

My goal: I can skip count and use equal groups to multiply.

Learn

- **Skip counting** means jumping by the same number: by 2s: 2, 4, 6, 8; by 5s: 5, 10, 15; by 10s: 10, 20, 30.
- **Equal groups:** 3 groups of 4 is 4 + 4 + 4 = 12. We write 3 × 4 = 12.
- **Even** numbers end in 0, 2, 4, 6, 8. **Odd** numbers end in 1, 3, 5, 7, 9.
- The × sign is read “times” or “groups of”.

3 groups of 4 = 3 × 4 = 12
